Things to Remember

- A call number should consist of the appropriate call number prefix (a Dewey number, 'FIC,' etc.) followed by the first three letters of the author's last name.
- Books should be shelved numerically and alphabetically according to call numbers.
- Only the call number prefixes on this list should be used in Granite libraries. Please contact district library specialists for approval before using any variations from this list.
- Spine labels should be typed or computer printed, not handwritten.
- Reading levels, genres, holidays, AR levels, etc., should all be indicated using spine stickers in addition to the standard spine label. Such information should not be included with the call number or on the spine label itself.
- Newbery, Caldecott, and other award-winning books should have the standard fiction or nonfiction call numbers. A separate sticker can be placed on the spine to indicate that the book is an award winner.
